Attended San Diego State 1964-66, then transferred to UC Berkeley; graduated in 1968 with a B.A. in psychology. Went on a 16-month vagabonding trip through northern Europe, England, and Israel, with many adventures. Picked apples and hops in England, and worked on a construction site in Israel to pay expenses. Back in the Bay Area, in 1970 worked in UCB Registrar's Office and later in the UCB Retirement Office. From 1973 - 2005 employed as U.S. Postal Letter Carrier in Berkeley, and am still retired today. After a long-term relationship, married in 2005, since separated.

Other activities include Astronomy, photography, electronics, guitar, travel and pinball -- all early interests -- have been and still are primary motivations.

In 1990 co-founded and still lead the Hercules Stargazers and the Hercules Public Stargazing Program, a monthly volunteer observational astronomy education outreach event in Hercules, California; member, Night Sky Network; member, Astronomical Association of Northern California (AANC); since 2007, an active participant in a weekly astronomy and related sciences lecture/discussion salon in Berkeley. Since the mid-1980's have travelled extensively to view and photograph total solar eclipses, both Venus Transits, the Mercury Transit, several comets, visit several observatories, planetaria and science museums, and search for dark skies. Currently planning trip to view/photograph the total solar eclipse in 2017.

Since 2007, have been a regular volunteer at the California Historical Radio Society (CHRS) Museum, now in Alameda; active in local neighborhood council working to restrain reckless over-development and improve traffic. Still play guitar occasionally, and recently began learning Hawaiian Slack Key style; regularly enjoy playing pinball, doing yard work, reading, walks in local hills, and old TV and radio shows.

I won't be attending the 50th Reunion, but hope to drop in sometime at the monthly lunch at Coco's. Would like to hear from some Class of '64 Scotties!
