600 months or 18,262 days equals 50 years, which seems like the time between the desert sunrise and an ocean sunset---to Damn short.

After leaving Helix with a short visit at G.J.C., I moved to Ontario, CA, where marriage #1 occurred along with 2 wonderful children, both attended Helix. I am now in my 4<sup>th</sup> and final marriage for 20 years so far, to Kathy, who is wonderfully patient, compassionate and still tolerates me. I now have a stepson. With the two children, being prolific and not following parental example, I now have 17 grandchildren (11 biological) and 3 great grandchildren. Please don't ask for names or birthdays.

In 1966 I began work with Chevron. By 1972 I was transferred to Concord, CA to assist with opening a combined credit and accounting center. In 1975, the desire to leave the oil industry led me to persue a health care career as a nurse. I have since worked in acute care, emergency department, spinal cord & brain trauma rehabilitation, prisons and jails, and drug rehab centers from San Diego to Chico CA. For the past 15 years I have been an onset nurse for the Motion Picture and Television industry. Presently in my 4<sup>th</sup> season with the TV show "Scandal".

I am not seeing retirement any time in the future. I am looking forward to seeing many friendly old faces with young & optimistic conversation.
