After Helix I obtained a B.S. degree in Chemistry from Harvey Mudd College (1968) and a Ph.D. degree in Physical Chemistry from Stanford University (1972). I worked in the Chemical Physics Department at AT&T Bell Laboratories from 1972-1984, the year the government destroyed the Bell System. I received the National Academy of Sciences Award for Initiatives in Research in 1981. I was appointed as Professor of Chemical Physics at Carnegie Mellon University in Pittsburgh in 1984. I am still a full-time faculty member there. I am a Chemical Historian and work in Philadelphia at the Chemical Heritage Foundation. I am the Chair of the History of Chemistry Division of the American Chemical Society.

I married Susan Stone (El Cajon, '64) in 1967 and we have one son, Kenneth, who is a lawyer in Oregon. We live in Vancouver, Washington, just across the Columbia River from Portland, Oregon.
