Unceremoniously left SDSC in '68 and entered the Air Force. 5 years in Germany perfected my German. I returned to SDSU and got a degree in Mechanical Engineering and German in '78. Stayed in the AF Reserves. Moved to Idaho for 5 years as a mechanical designer for a Railroad Locomotive rebuilder. Was in the Air Guard up there and got my Commission as a 1st Lt in the 124 Civil Engineer Squadron. Rejoined the Air Force in moving here in '83 as the Base Engineer for the 171st Air Refueling Wing here in Pittsburgh, PA. Retired as a Major in '96. After several short job stints, I became a state employee with the Commonwealth of Pennsylvania serving with the military unit I retired from! How cool is that?? I retired from the state in '14. Since retiring, I've learned that the root word in the word retirement is 'TIRED!!'
