

Charlaine Turner (Prill)

charprill@cox.net

About 3 years after graduation, I married my husband Kenny Prill and we started a family. I stayed home for the early years with Scott (now 46-race car builder) and Heather (now 43-research scientist) and we always enjoyed traveling/vacationing whenever possible. Later, I went on to work in administration in the medical field and then to have my own small business in design & faux painting. We love to travel and have a very active & fun social life. No grandchildren, we do have a dog, Lucy and life is wonderful.
