After graduation I served six and a half years in the US Army. I married Margaret in 1966. I worked for 25 years in the landscape construction, then went to work for Southwestern Community College in the landscape and nursery department as an instructional lab technician. I received my A.S. degree in Horticulture in 2006 and retired in 2008. Since retiring I enjoy golfing, camping, tinkering with wood projects and some metal fabrication. I also enjoy talking with people about how to improve their landscape and how to conserve water.
